

## Scrappy Trails to You - Step 3

Join 6-1/4" Color 1 quarter-square triangles with 3-3/8" Color 2 and light half-square triangles to make 24 "flying geese" units that look **exactly** like Unit E below. Combine the fabrics at random. See the stitching and pressing tips at the right. The units should measure 3" x 5-1/2" (raw edge to raw edge) when sewn.

Unit E. Make 24. Unit F. Make 24.

Now join 6-1/4" Color 2 quarter-square triangles with 3-3/8" Color 1 and light half-square triangles to make 24 "flying geese" units that look **exactly** like Unit F above. Combine the fabrics at random. See the stitching and pressing tips at the right. The units should measure 3" x 5-1/2" (raw edge to raw edge) when sewn.

### STITCHING TIPS FOR FLYING GEESE UNITS

1. Join left-hand triangle: Match points (A) and bottom edges; sew in direction of arrow. Press seam toward smaller triangle.

2. Join right-hand triangle. Start at arrow. Your 1/4" seam should **EXACTLY** intersect the 90-degree angle where the two smaller triangles meet, as in the magnified portion of the drawing. Adjust the position of the loose triangle until the seam lines up correctly. Take a few stitches, then match points (B) and finish stitching the seam. Press seam toward smaller triangle.

### Uhuru Challenge Notes:

 It is **strongly recommended** that you take a few minutes to practice the "geese units" - every machine and every quiltmaker are a little different. The units should measure exactly 5 1/2" by 3" with equal distance on either side of the central point. Taking the time to be accurate now will have a big payoff later!

 Cut the triangles as you go, to preserve the bias edges. There will be some "geese" triangles left over - they will be used later in Step 5.

 If you are making the lap-size, you'll need 40 units of each colorway.

Unit E

Unit F
